

SkLO : CARE INSTRUCTIONS

GLASS

SkLO hand blown glass should be cleaned only with a soft lint-free or microfiber cloth using lukewarm water and a small amount of mild liquid dishwashing detergent, followed by a rinse with clean lukewarm water. Dry with a lint-free or microfiber towel in order to prevent spots. Wash **only** with lukewarm water - never expose hand blown glass to extreme temperatures, either hot or cold.

Do not wash hand blown glass in the dishwasher.

Dust with a soft dry cloth as needed. Canned air can be used to remove dust from unreachable areas.

METAL FINISHES

DARK OXIDIZED STEEL

SkLO:OBJECT dark oxidized table stands, wall hooks, and sculpture armatures have a clear architectural powder coat finish. Do not use cleaners, chemicals or abrasives. Dust with a soft dry cloth. Wash only with a clean damp cloth and dry with a lint-free cloth. Do not immerse in water.

BRUSHED BRASS + DARK OXIDIZED BRASS

SkLO:OBJECT brushed brass table stands and wall hooks, SkLO:LIT metal lighting components, stems and canopies have a hand-applied wax finish. Soft cotton or nitrile gloves must be worn during installation. Chemicals, cleaners and abrasives will damage or remove the finish. Wax finishes are not permanent, they are meant to be a living finish that is imperfect and changes over time, naturally darkening or polishing with age, use, and exposure. Wax finishes should be dusted with a soft dry cloth as needed. If desired, a wax finish can be re-applied over time with an archival quality wax - such as Renaissance Wax - per the manufacturer's instructions, but this not strictly necessary and is up to the preference of the individual.

POLISHED NICKEL PLATED STEEL + BRASS

Care must be taken not to scratch the polished nickel plate during installation and use. Soft cotton or nitrile gloves must be worn during installation. Clean and polish only with a soft lint-free cloth. Do not use chemicals, cleaners or abrasives.
