

BEAD CHAIN 11 WALLPIECE

Installation Instructions

Congratulations on your purchase of a SkLO Bead Chain 11 Wallpiece.

When unpacking individual items and parts of the object, make sure to lay them out on a protective surface that will neither mar the delicate metal finishes nor scratch the glass. Gloves (nitrile) are provided and must be worn during installation to avoid fingerprints on the finish of the exposed metal parts.

Your SkLO object will arrive with the hand blown glass elements packed separately from the metal parts.

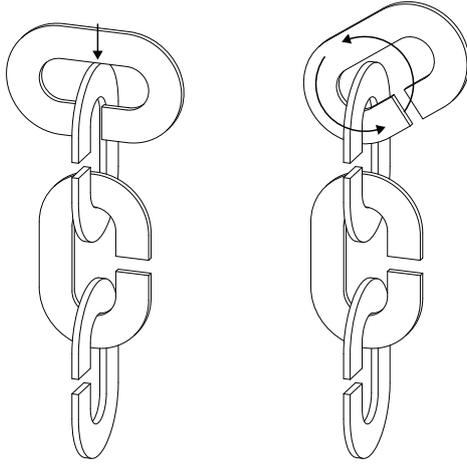

CONTENTS:

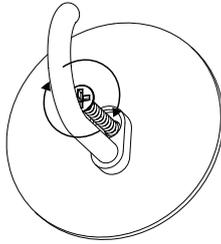

Chain link		Screw		2 loops		2-loop stem		1-loop stem	
		17x		2x	1x				
Glass element		Hook							
		Plate							
				2x					
		11x				2x	9x		2x

1. Connect 13 chain links together to form one chain and determine the desired draping distance. Then, create two more chain segments using the remaining chain links. Take great care when connecting the chain links so that they do not scratch (Figure 1).
2. Install the two hooks with appropriate hardware for the wall (Figure 2).
3. Hang the completed chain on the hooks (Figure 3).
4. Hang the two chain segments, one on each hook (Figure 4).
5. Attach the two one-loop stems, one on each chain segment (Figure 5).
6. Working from both sides, start adding the glass elements. Carefully, one at a time, slide the glass elements up over the stems and thread on the two-loop stems so that the glass can rest on the loops (Figure 6).
7. Add 5 glass elements to each side. Finish this step by threading on the two-loop stem to one end (Figure 7a) and the two loops with no stem to the other end (Figure 7b).
8. Finally, add the eleventh piece of glass and connect the two ends by threading the two loops onto the two-loop stem (Figure 8).
