## dew vessel

SkLO *dew* vessels are substantial, visually complex pieces that evoke the molten nature of handblown glass. They start as simply shaped vessels of opaque colored glass which are then layered with dripping pieces of molten clear glass. The outside is then given a sandblasted finish. The tops are then cut and polished to reveal the unique details of the layers. Bottoms are cut and polished. No two exactly alike.

Three shapes, two colors

All glass dimensions are approximate – handblown glass dimensions vary by nature and intent
