float vessel

The SkLO *float* vessels are organic spheres of Czech glass with broken flame polished mouths. They are entirely free-blown, produced without the use of moulds to shape them. The tops are given a slight ripple where they are dipped twice into the molten glass, and the mouths broken from the blowpipe and fire polished while hot. These subtle details elevate the simple sphere to a unique thing of beauty that speaks entirely of the Craft of glass blowing. Designed to create compositions of mixed and matched colors and sizes. Whether it is a small vignette or a large installation, these pieces create a relationship to one another and glow in any space they inhabit.

All glass dimensions are approximate – handblown glass dimensions vary by nature and intent
Handblown in the Czech Republic

VA250RED	float vessel red	4"Dia (10cm)
VA250SMK	float vessel smoke
