seed long vessel

SkLO *seed long* vessels are organic lengths of solid clear glass with colored glass voids at each end. Two complementary colors are used on each, one transparent and one opaque color. The ends are oblong, the waist narrow, with just enough of a ground and polished flat seat for the piece to stand on its own. One mouth is formed smooth while hot, the other broken from the pipe and fire polished. Intentionally irregular, no two exactly alike.

Five color palettes available

All glass dimensions are approximate – handblown glass dimensions vary by nature and intent
Handblown in the Czech Republic
