

SkLO : LIT

balance *pendant*

balance pendant shown with opaque white glass and brushed brass metal finish

balance pendant

The *balance* pendant is a minimal, sculptural suspended light composed of a larger lit 7" (18cm) diameter sphere on a short horizontal stem balanced by a smaller lit 4 1/2" (11cm) diameter sphere on a longer, downward arcing stem. The spherical glass diffusers feature the signature SkLO double-dipped, fire-polished mouths which show where the glass is broken from the blower's pipe, making each unique.

UL LISTED SUITABLE FOR DAMP LOCATIONS (US & CANADA)

Sockets: 120V E12 (candelabra) 7W Max (G9 sockets available on request)

Canopy: Brass canopy with exposed fasteners. Recessed steel electrical box required for installation

dew pendant

dew pendants shown with brushed brass metal finish

dew pendant

The *dew* pendant is an intense expression of the molten nature of handblown glass. For a diffuser, the *dew* pendant features a solid sculpted glass shape composed of layers of glass applied while hot, giving it a "dripping" appearance. The glass is permanently attached to the solid brass armature, which is hidden behind a brass cylinder. The light bulb is changed by simply lifting the brass cylinder upwards to access the socket. Note that the fixture also "uplights" slightly through the open top of the cylinder. The glass diffuser element is available in either clear glass or sandblasted glass, for two very different effects.

drape arm 1 *sconce*

*top: drape arm 1 sconce shown with long arm, 4 1/2" smoke glass and brushed brass metal finish
bottom: drape arm 1 sconce shown with short arm, 4 1/2" opaque white glass and dark oxidized metal finish*

drape arm 1 *sconce*

The *drape arm 1* sconce consists of a single lit sphere of handblown Czech glass suspended from a moveable arm. The sphere is either 4 1/2" (11cm) or 7" (18cm) diameter and is suspended from the arm on a fabric-wrapped electrical cord. The exposed cord passes through the end of the arm and returns to the canopy at the wall. Solid brass construction throughout, the arm is hinged for a full 180-degree horizontal swing and is available in two lengths. The spherical glass diffusers feature the signature SKLO double-dipped, fire-polished mouths which show where the glass is broken from the blower's pipe, making each unique.

The *drape hook* pendants are a series of organic multi-light fixtures that allow for infinite composition and variation. Available in nine, seven, five, and three-light versions, *drape hook* offers a unique ability to integrate into architecture and interiors. It consists of multiple 4 1/2" (11 cm) diameter pendants of handblown Czech glass individually suspended from a single canopy on fabric-wrapped cords. The spherical glass diffusers feature the signature SkLO double-dipped, fire-polished mouths which show where the glass is broken from the blower's pipe, making each unique. Each individual cord comes with a custom solid brass loop attached, allowing for the individual pendants to be composed and hung from their individual solid brass ceiling hooks (included).

UL LISTED SUITABLE FOR DAMP LOCATIONS (US & CANADA)

Sockets: 120V E12 (candelabra) 7W Max (G9 sockets available on request)

Canopy: Brass canopy with exposed fasteners. Recessed steel electrical box required for installation

push *table*

push table light shown with brushed brass hardware – inset shows "push" detail at top of the glass

push table

The *push* table light is a minimal, curving, tapered cylinder of handblown opaque white glass, transformed into a compelling table light with the addition of a clever brass armature. A brass ring slides over the top of the glass and supports a brass tube which bends into a depression in the top lip of the glass, produced while hot on the glass blower's pipe. A fabric-wrapped electrical cord suspends a brass socket and light bulb from the tube down within the glass diffuser. The detail in the glass evokes the molten origins of the handblown glass, and the interaction between brass and glass make for a sophisticated light.

reflect *pendant*

from left: shape 1, shape 2, and shape 3

reflect pendant

The SkLO *reflect* pendants are a series of mirror plated glass pendants in different geometric shapes. The glass is mirrored using a unique process that produces an opaque mirror appearance when the light is off but allows light to pass through when on. Each shape has an open mouth at the bottom – the holes are ground flat and polished. The mirrored glass shades rest atop a disc at the end of the rigid brass stem – light bulbs are accessed by either reaching through the open hole or by carefully raising the glass up over the bulb.

UL LISTED SUITABLE FOR DAMP LOCATIONS (US & CANADA)

SkLO

wrap *light*

wrap light shown with opaque white glass and brushed brass metal finish

wrap light

Our signature SkLO *large wrap* object, a continuous wound length of handblown Czech glass tube, is transformed here into a dynamic table light. The brass light socket has an integral handmade brass hook that allows it to attach to the glass *wrap*, suspending the bulb within. Each *wrap* is unique, no two exactly alike.

Socket: 120V E26 60W Max

6 ft (180cm) black fabric-wrapped cord with in-line switch

Bulb included

Two metal finishes available: dark oxidized / brushed brass (other finishes available on request)

Glass available in seven colors (including clear) and one mirrored finish

All glass dimensions are approximate – handblown glass dimensions vary by nature and intent

float vessel

The SkLO *float* vessels are organic spheres of Czech glass with broken flame polished mouths. They are entirely free-blown, produced without the use of moulds to shape them. The tops are given a slight ripple where they are dipped twice into the molten glass, and the mouths broken from the blowpipe and fire polished while hot.

These subtle details elevate the simple sphere to a unique thing of beauty that speaks entirely of the craft of glass blowing. The *float* vessels come in 5 sizes, and each size is available in two different colors, making up two different color palettes. The color palettes reflect the idea that floats work best in groups, with the color palettes carefully curated to allow for many possibilities.

ring bowl

A broad, shallow bowl of handblown glass that sits freely atop a brass ring base. The handblown glass bowl is blown without the use of a mould – it is shaped by hand while hot on the glass blower's pipe, and it is extra thick and massive as a result. This allows for the lip of the glass bowl to be cut and highly polished. The sturdy brass ring is custom made to fit the bowl, elevating it.

Available in three sizes

Glass available in three colors (including clear). Brass ring available in brushed brass finish only
All glass dimensions are approximate – handblown glass dimensions vary by nature and intent
Handblown in the Czech Republic

available in: clear-CLR plum-PLM steel blue-SBL

SkLO

root *object*

Root is a length of solid clear glass, whose length is marked by random locations where glass is organically added, then cut and ground nearly completely off, leaving highly polished and flat cylindrical shapes. Evocative of the shapes of nature, yet also a compelling expression of glass and the skill behind its handmade origins. Includes dark oxidized steel table stand for display.

Available in clear glass only

Stand available in dark oxidized finish only

sway bowl

The SkLO sway bowls are asymmetrical organic bowls with amazing depth of color executed in extremely thick Czech glass. Two complementary glass colors are used in each piece to create an amazing and rich color effect. The SkLO sway is a timeless design that works within a large range of styles and interiors. The sway high bowl is taller and narrower; the sway long bowl is an irregular oval. Organically shaped, no two are exactly alike.

taper vessel

Double-sided vessels composed of tapering conical shapes joined together at their narrowest points. Using moulds to blow the individual glass shapes allows careful control over the exact sizes and proportions of the finished piece. Each half of each unique taper vessel is a different transparent color, and the color palette of the entire collection carefully repeats itself to insure multiple vessels always work together as a composition. Each end is open so that the vessels are entirely functional and reversible – the open ends are cut and finish polished. Five unique shapes, in a palette of carefully curated colors. Handblown in the Czech Republic.

view bowl

The view bowl is created by combining two separate shapes while hot on the glass blower's pipe. The form of the bowl is pressed against a cylindrical base, the rounded surface of the bowl pushing into the space within the cylinder. The tops and bottoms are then cut and polished. Each view bowl is made up of two transparent colors, one for the bowl and one for the base, creating a complex color relationship. The view bowl is available in two different sizes. Each size is available in three unique color palettes. Handblown in the Czech Republic.
