## Multi-pendant Canopy Hook & Loop System

Multi-pendant Canopy Hook & Loop System is designed to accommodate multiple stem-suspended pendants that are connected to one electrical box or wiring location. Each canopy comes with an equal number of holes and hook & loop assemblies.

The fixture hangs from a hook-and-loop assembly that fastens directly to the ceiling.

An exposed fabric-wrapped electrical cord swags from the canopy to the fixture. Swagged cord length is field adjustable. The standard swagged cord length is 72"/1830mm. Longer swagged cord lengths are available at an additional cost.
