SCONCE

SkLO + AvroKO

The designs of the Union lighting series combine upward- and downward-oriented glass dome shapes of different proportions in carefully curated palettes that mix color, transparency, and texture. The Union Sconce combines a long, narrow, lit dome of opaque glass on the lower half with a smaller, upward-facing dome of frosted glass. The two domes are separated by a brass element featuring classic detailing. The Union Sconce offers a meaningful presence in a modest package. Available in multiple glass color combinations, and brass hardware finishes. Part of the SkLO + AvroKO collection – a collaboration between SkLO and the AvroKO Partners.

Socket 220-240V G9 7W Max (LED bulb included)

Requires recessed electrical box for installation

Fixture weight (approximate): 2.3kg

Handblown glass production results in variation in dimensions, shape, color saturation, color tint, and imperfections such as small bubbles. This is part of SkLO design intent

Made in the Czech Republic

LT630 [-----][--] Union Sconce
