

SkLO

Light

The desire to bring light to glass is irresistible. It is precisely this unique relationship with light that makes handblown glass so magical. It is this phenomenon that we explore in the designs of our Light Collection.

Our process of design and development is painstaking. We bring metal to the glass, to give structure and scale. Rather than an afterthought, it is the relationship between metal, glass, and light that drives our design process. Our designs seek to achieve harmony and balance between these materials, to give beautiful light. We achieve this through technology and complexity, but the light itself must seem natural and effortless.

In our Light Collection, our commitment to craft and handmade quality goes beyond the handblown glass. Our metals are substantial and solid. Exposed fasteners and expressed joints mark our work. Traditional metalsmithing, custom machining, hand-applied finishes, and careful attention to detail are the hallmarks of SkLO.

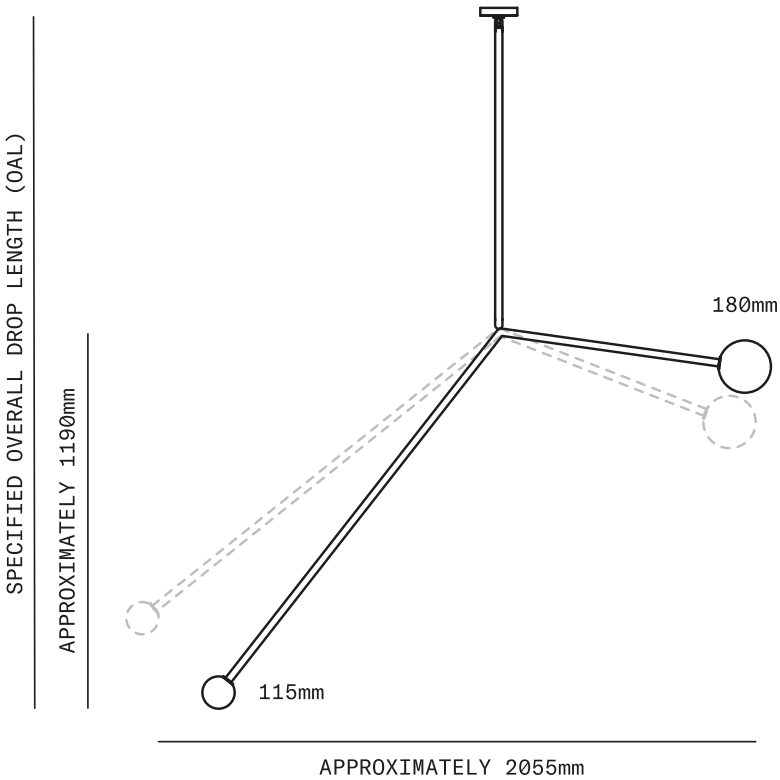

SkLO is a design and manufacturing company with locations in both California (SkLO US) and the Czech Republic (SKLO EU). We produce lighting to serve global markets, with certifications such as UL listing and CE marking.

SkLO
Angle 1.0
PENDANT

ANGLE 1.0 PENDANT
Shown in neutral gray textured glass and brushed brass metal finish

The designs of the Angle Pendants series combine dynamic, asymmetrical tubular brass structures with minimal handblown glass diffusers to create striking yet airy compositions perfect for large spaces and tall volumes. The Angle 1.0 Pendant is the simplest of the series, an inverted “V” which hints at symmetry but carefully defies it. The combination of two different-sized spherical glass diffusers – 180mm and 115mm – shifts the composition. Subtle variations in the weight of each handblown glass diffuser mean that the aspect of the pendant will have an inherent range – see drawings and specifications for more information on specifying overall drop length for this design. This is part of the design intent, adding depth and originality to every fixture.

Sockets 220-240V G9 7W Max (LED bulbs included)

Accommodates sloped ceilings up to 30 degrees. Other canopy options for steeper slopes are available at an additional cost. Visit the Accessories page on our website to see available canopy options and review compatibility.

Specify overall drop length – Rigid brass tube stems are not field adjustable – Note that due to intentional variations in the weight of the handblown glass diffusers, this light fixture has an inherent height dimension variation of 230mm – SkLO cannot guarantee overall drop length specifications beyond an approximate variation of ± 115mm.

Minimum overall drop length: 1650mm

Lengths over 2285mm available at additional cost

Fixture weight (approximate): 7kg

Handblown glass production results in variation in dimensions, shape, color saturation, color tint, and imperfections such as small bubbles. This is part of SkLO design intent

Made in the Czech Republic

SkLO
Angle 2.0
PENDANT

ANGLE 2.0 PENDANT
Shown in smoke dipped glass and brushed brass metal finish

The designs of the Angle Pendants series combine dynamic, asymmetrical tubular brass structures with minimal handblown glass diffusers to create striking yet airy compositions perfect for large spaces and tall volumes. The Angle 2.0 Pendant combines three spherical glass diffusers positioned at the ends of arms of different lengths, which aim in different directions. The two larger 180mm diffusers contrast with the smaller 110mm diffuser. Its graceful composition suggests dynamic movement. Subtle variations in the weight of each handblown glass diffuser mean that the aspect of the pendant will have an inherent range – see drawings and specifications for more information on specifying overall drop length for this design. This is part of the design intent, adding depth and originality to every fixture.

SkLO
Angle 3.0
PENDANT

ANGLE 3.0 PENDANT
Shown in white dipped glass and brushed brass metal finish

The designs of the Angle Pendants series combine dynamic, asymmetrical tubular brass structures with minimal handblown glass diffusers to create striking yet airy compositions perfect for large spaces and tall volumes. The Angle 3.0 Pendant combines three spherical glass diffusers positioned along a length of zigzag brass tubing. The single larger 180mm diffuser rests opposite the two smaller 110mm diffusers. The result is a calm, ethereal expression of graphic energy. Subtle variations in the weight of each handblown glass diffuser mean that the aspect of the pendant will have an inherent range – see drawings and specifications for more information on specifying overall drop length for this design. This is part of the design intent, adding depth and originality to every fixture.

Sockets 220-240V G9 7W Max (LED bulbs included)

Dew

PENDANT

CE ENEC CB IP20

The Dew Pendant is an intense expression of the molten origins of handblown glass. For a diffuser, the Dew Pendant features a solid sculpted glass shape composed of layers of glass applied while hot, giving it a dripping appearance. The glass is permanently affixed to the solid brass armature, hidden behind a minimal brass cylinder, which lifts to give access to the bulb. The fixture uplights slightly through the open top of the cylinder. The glass diffuser is available in either clear glass, or frosted clear glass, for two very different effects.

Drape Linear 7

CHANDELIER

CE ENEC CB IP20

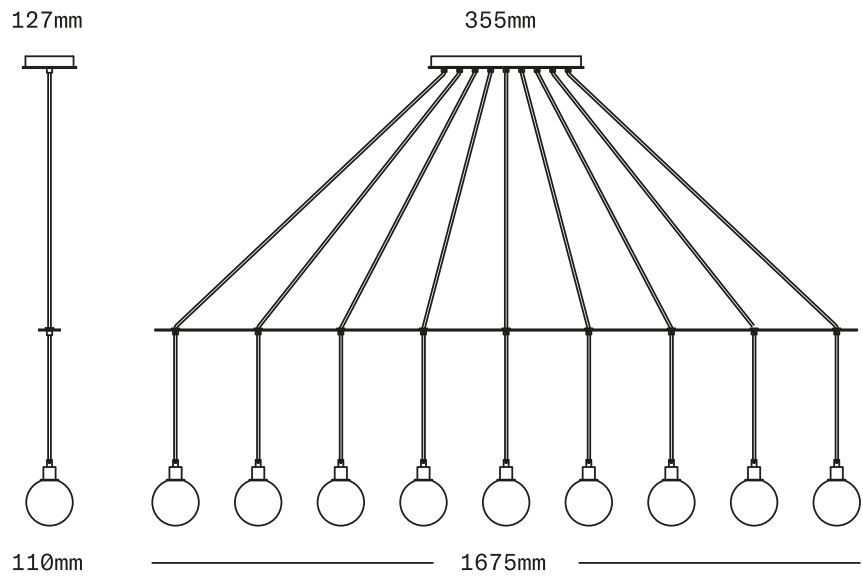

The Drape Linear 7 Chandelier consists of 7 individual pendants gathered into a straight line and supported by a flat brass bar. Each pendant features a 110mm diameter diffuser of handblown Czech glass suspended on a fabric-wrapped electrical cord. The cords pass through and are affixed to the bar and are evenly spaced around its length. The glass diffusers are available in both "dipped" glass, featuring the SkLO double-dipped flame-polished mouth and "textured" glass, featuring a soft, frosted finish and subtle sculpted vertical ridges. Cord lengths are field adjustable.

Drape Skirt 9
CHANDELIER

DRAPE SKIRT 9 CHANDELIER
Shown in white dipped glass, brushed brass metal finish, blue cord

CE ENEC CB IP20

The Drape Skirt 9 Chandelier consists of 9 individual pendants gathered and supported by a central brass “skirt” structure. Each pendant features a 110mm diameter diffuser of handblown Czech glass suspended on a fabric-wrapped electrical cord. The cords pass through the tubes of the “skirt“, and the slight friction created by the cord passing through the bent tubing holds the “skirt” in place. The “skirt” element can be located anywhere along the length of the fixture/cords. The glass diffusers are available in both "dipped" glass, featuring the SkLO double-dipped flame-polished mouth and "textured" glass, featuring a soft, frosted finish and subtle sculpted vertical ridges. Cord lengths are field adjustable.

FLOAT 1.0 PENDANT
Shown in smoke glass, brushed brass metal finish

Spheres of lit handblown glass suspended on brass tube stems, the Float 1.0 Pendants are both simple and elegant. The openings at the bottom of the glass feature an organic, layered detail where we dip the spheres twice into the molten glass during production. The lip of the opening is then cut and polished smooth. These details express their handmade nature without sacrificing their minimal feel. Available in two sizes.

Socket 220-240V E27 60W Max (LED bulb included)

HOLD PIN 1.09 PENDANT
Shown in white glass, brushed brass metal finish, black cord, north-american canopy

CE ENEC CB IP20

An expressive glass vessel that appears to stretch under its weight serves as a shade in this pendant. The glass element here is different from that of the Hold Sconce and Hold Pendant in that it is round and not flattened, and it is also of a different size. The glass element hangs from a brass “pin” element, made of a continuous ribbon of the brass bar, which opens and closes to allow for removal of the glass. The brass socket is suspended on an exposed fabric-wrapped electrical cord from the top of the “pin” and suspends the light bulb within the opening at the top of the glass.

Socket 220-240V G9 7W Max (LED bulb included)

Standard canopy does NOT accommodate sloped ceilings or swagging of this light. Other canopy options are available at an additional cost. Visit the Accessories page on our website to see available canopy options and review compatibility

SCONCE

SkLO + AvroKO

PERLA SCONCE
Shown in pastel green glass, brushed brass metal finish

The Perla Sconce arranges two ellipsoid opaque glass diffusers at either end of a brass armature of fluid decorative profiles. The two ellipsoids are individually lit and are oriented in an up and down position. Perla has an intriguing personality that elevates spaces and adds allure. Available in two profile options, multiple opaque glass colors, and brass hardware finishes. Part of the SkLO + AvroKO collection – a collaboration between SkLO and the AvroKO Partners.

Sockets 220-240V G9 7W Max (LED bulbs included)

Requires recessed electrical box for installation

Fixture weight (approximate): 2.3kg

PILLOW PENDANT
Shown in small clear frosted/white glass, brushed brass metal finish

SkLO Pillow

PENDANT

Lit spheres of glass are nestled into a curving recess in a larger frosted pillow of glass. Each of the two shapes is available in three colors, allowing for a multitude of possible combinations. The soft organic geometry of the Pillow Pendants lends an approachable whimsy; the relationship between the smooth, smaller glass shape inside the concave, frosted outer glass adds an intriguing complexity. Suspended on a brass tube stem.

PRINCE PENDANT
Shown in pastel green/pine tree green glass, brushed brass metal finish

SkLO

Prince

PENDANT

SkLO + AvroKO

The Prince Pendant gets its look by layering shape, color, and transparency in handblown glass. A curvy double-ellipsoid outer glass diffuser is rendered in transparent colored glass, and it embraces an inner cylindrical diffuser of opaque glass. The opaque glass glows through the vibrant transparent glass. The effect is gorgeous and demure. The pendant stem transitions above the glass into a decorative metal profile. Available in multiple profile options, glass color combinations, and brass hardware finishes. Part of the SkLO + AvroKO collection – a collaboration between SkLO and the AvroKO Partners.

CE ENEC CB IP20

Series of mirror-plated glass pendants in different geometric shapes suspended on rigid brass stems. The glass is mirrored using a unique process that produces an opaque mirror appearance when the light is off but allows light to pass through when on. Each shape has an open mouth at the bottom, the hole ground, and polished. The glass sits on a rest at the end of the stem and lifts to expose the socket for changing the bulb.

Rest

PENDANT

Conical shapes of honed carrara marble that support frosted handblown glass shades. Each is topped with a custom brass finial and suspended on a rigid brass stem. The glass shades have an angular geometry that bevels inward at the bottom. The three unique shapes have different proportions and angles, yet all share the same language, making them natural partners when used in groups within the same space. The pairing of metal, marble and handblown glass give them a classic presence.

TWICE LIGHT
Shown in white glass, brushed brass metal finish

SkLO

Twice

LIGHT

CE ENEC CB IP20

The Twice Light consists of two lit diffusers of handblown Czech glass connected by a cylindrical brass armature. Two diffusers of different diameters make for an asymmetrical light, and they can be ordered in either the same glass color for a monochrome look, or the diffusers can be two different glass colors. A brass ring is included with the light and used under the large diffuser to stabilize the light. The glass diffusers feature the signature SkLO double-dipped, fire-polished mouths which show where the glass is broken from the blower's pipe, making each piece unique.

Sockets 220-240V G9 7W Max (LED bulbs included)

1830mm black fabric-wrapped cord with in-line switch

Handblown glass production results in variation in dimensions, shape, color saturation, color tint, and imperfections such as small bubbles. This is part of SkLO design intent

SkLO
Twin 1.0
SCONCE

CE ENEC CB IP20

The Twin 1.0 Sconce features a two-tone diffuser of handblown Czech glass made up of two flattened spherical shapes in two colors which are melded together while hot on the glass blowing pipe. The glass is held to a solid brass plate canopy by a brass band that sits between the two spheres. Each sphere is lit from within by its bulb, one in each sphere. For wall use only – for ceiling applications see the Twin 2.0 Sconce/Ceiling Light. It is strongly recommended that the Twin 1.0 Sconce only be installed in the vertical orientation as shown.

Sockets 220-240V G9 7W Max (LED bulbs included)

Requires recessed electrical box or other provision to safely make the electrical connections, see installation instructions for more details

Fixture weight (approximate): 2.75kg

UNION PENDANT
Shown in light beige/olivin glass, dark oxidized metal finish

SkLO

Union

PENDANT

SkLO + AvroKO

The designs of the Union lighting series combine upward- and downward-oriented glass dome shapes of different proportions in carefully curated palettes that mix color, transparency, and texture. The Union Pendant is the largest of the series, composed of three different glass colors and textures. The lower part of the pendant houses its light source within a long, narrow, opaque glass dome, which is itself enclosed within a larger transparent glass dome. Above the detailed brass hardware transition sits a smaller, upward-facing dome of frosted glass. The color palettes are carefully curated to be both compelling and stately. Available in multiple glass color combinations, and brass hardware finishes. Part of the SkLO + AvroKO collection – a collaboration between SkLO and the AvroKO Partners.

Socket 220-240V G9 7W Max (LED bulb included)

Requires recessed electrical box for installation
