The Dew Pendant is an intense expression of the molten origins of handblown glass. For a diffuser, the Dew Pendant features a solid sculpted glass shape composed of layers of glass applied while hot, giving it a dripping appearance. The glass is permanently affixed to the solid brass armature, hidden behind a minimal brass cylinder, which lifts to give access to the bulb. The fixture uplights slightly through the open top of the cylinder. The glass diffuser is available in either clear glass, or frosted clear glass, for two very different effects.
