Conical shapes of honed carrara marble that support frosted handblown glass shades. Each is topped with a custom brass finial and suspended on a rigid brass stem. The glass shades have an angular geometry that bevels inward at the bottom. The three unique shapes have different proportions and angles, yet all share the same language, making them natural partners when used in groups within the same space. The pairing of metal, marble and handblown glass give them a classic presence.

UL listed suitable for dry and damp locations (US & Canada)
