Gift Program

# Who We Are

SkLO designs and manufactures lighting, furniture, objects and drinkware in hand blown glass. Every SkLO product is made with a deep appreciation for the richness of its organic material and the historical craft tradition it embodies.

All SkLO glass is produced exclusively in our own studios in the Czech Republic. One of the oldest glassblowing traditions in the world, Czech glassblowing dates back to the 14th century. In 2023, UNESCO recognized Czech Glassblowing with the status of Intangible Cultural Heritage. Hundreds of years of skill and knowledge have been passed down through generations of Czech artisans, making them some of the best glassblowers working today. The work we produce is some of the highest quality blown glass available in the world. We consider it a privilege to work with this craft tradition, and by working with it we also actively preserve it.

## SkLO Gifts

The SkLO Gift Program offers the opportunity to build and strengthen relationships with customers, business partners and employees by providing luxurious handmade gifts. Program features include:

*High-quality artisan craftsmanship and original designs tailored to meet budget requirements*

*Access to the SkLO Custom Glass Color Program*

*Custom product etching that allows each gift to display a logo or branding of choice*

*Custom-designed gift packaging that can include branded printing*

*Drop-ship delivery*

SkLO produces four product collections of lighting, objects, furniture, and drinkware. While any of our products are available for selection as a gift, we have assembled on the following pages a selection of products from our Object Collection and Tabletop Collection which are ideal sizes for gifting and make up the most popular selections.

If you do not see what you are looking for, please inquire with us directly.

# Custom Glass Color Program

We make the advantages of our Custom Glass Color Program available to all corporate gift orders.

Our Custom Glass Color Program expands access to our entire range of glass colors, allowing products to be ordered in colors beyond the standard colorway for each product. This allows for tremendous opportunities to customize gift items.

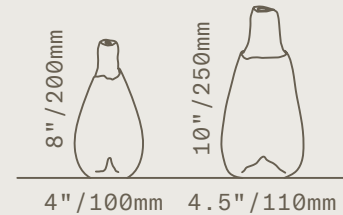

Learn more about the Custom Glass Color Program and its terms and conditions on our [website](#).

## Gift Ideas from the SkLO Object Collection

# Bottle Vessel

Expressive vertically proportioned vessels. The necks are double-dipped, and the mouths broken hot from the glassblower's pipe and fire polished. The bottoms have a slight indent detail, a reference to classic glass bottle design. Handblown, no two exactly alike. There are five sizes in the series, the smallest two shown here are ideal for gifting. Other sizes are available - see our website for more information on the [Bottle Vessels](#)

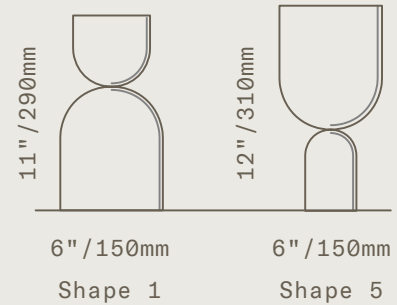

# Crescent Vessel

Minimal double-sided vessels composed of two different shapes in different transparent colors. Each half of each shape is a different diameter and proportion, with hemispherical ends joined dynamically together just where the two curves meet. The open ends are cut and polished so that the vessels can be oriented with either end up. The Crescent Vessels are available in six unique shapes and sizes - the two smaller sizes shown here are ideal for gifting. Other sizes also available - see our website for more information on the [Crescent Vessels](#)

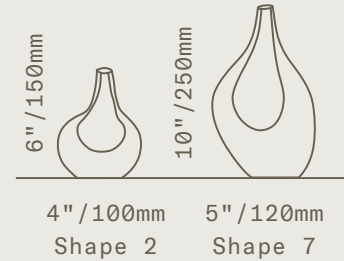

# Droplet Vessel

The Droplet Vessels are a collection of seven small- to medium-sized vessels, each unique in shape and color. The vessels are asymmetrical, each a mass of solid clear glass around a complementary shaped void of transparent color. The two sizes highlighted here are perfect sizes for gifting, but any of the Droplet shapes are available - see our website for more information on the [Droplet Vessels](#)

# Echo Vessel

Rounded asymmetrical bowl shapes of handblown glass in transparent colors with dimpled voids at their tops. The vessels are mirror-finished from the inside, giving them their distinct metallic reflective surface. Intentionally off-center, each echo evokes its handblown origins. The smallest size, shown here, is an ideal size for gifting. They are available in three sizes and four standard colors - see our website for more information on the [Echo Vessels](#)

6" / 150mm

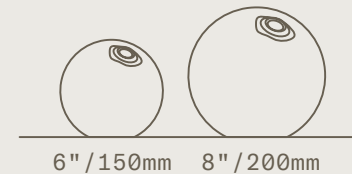

8" / 200mm

# Float Vessel

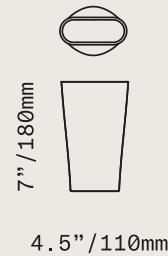

Organic spheres of handblown glass with flame polished mouths. They are entirely free-blown, produced without the use of moulds to shape them. The tops are given a slight ripple where they are dipped twice into the molten glass, and the mouths broken from the blowpipe and fire polished while hot. These subtle details elevate the simple sphere to a unique thing of beauty that speaks entirely of the craft of glass blowing. These smallest two of the five different sizes are ideal for gifting. See our website for more information on the [Float Vessels](#)

# Pinch Vessel

Cylindrical at the base, the Pinch Vessels transitions along its length to an oval shape at the top. Perfectly functional, yet also a sophisticated minimal object on its own. There are four sizes of Pinch Vessel - the smallest size shown here is perfect for gifting. Other sizes also available. See our website for more information on the [Pinch Vessels](#)

# Wrap Object

A wound length of handblown glass tube. Each Wrap Object is a unique handmade piece, no two are exactly alike. The Wrap makes a perfect decorative gift, it implies different meanings with it's knotted appearance and infinite loops. An object which displays the beauty and immediacy of glassblowing. See our website for more information on the [Wrap Object](#)

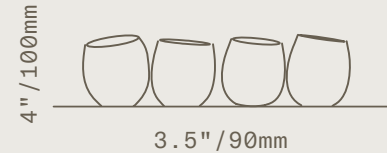

7" / 180mm

## Gift Ideas from the SkLO Tabletop Collection

# Drink Glass

Collection of minimal glassware with a focus on color. Drink are intentionally irregular, with a distinct off-center attitude that identifies them as skillfully handmade. Each is individually handblown, no two are exactly alike. See our website for more information on the [Drink Glass](#)

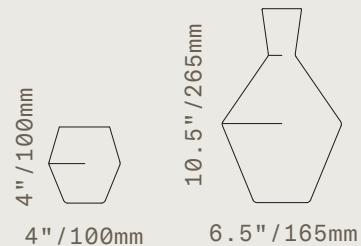

# Diamond Series

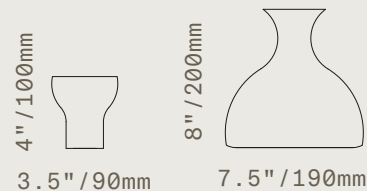

The angular shape of the Diamond Decanter is both playful and chic, with a mid-century charm. Carefully proportioned, it is both beautiful and functional. The well-balanced proportions of the Diamond Glass make it sculptural when on display and a pleasure to use. Perfectly sized for wine, water or cocktails. See our website for more information on the [Diamond Glass](#) and [Diamond Decanter](#)

# Bell Series

A curving “S” silhouette gives the Bell Decanter its name. The decanter is broad and flat at the base, and narrows toward the top, curving into a flared rim. The Bell Decanter is a stately, classic form that exudes gravity. The Bell Glasses have a reverse curve to match the decanter. Narrow at the base, they curve open into a wide bowl at the top. A smaller glass, Bell is an elegant choice for still and sparkling wines or your favorite apertif. Available in three vibrant transparent glass colors in either a frosted or standard glass finish. See our website for more information on the [Bell Glass](#) and [Bell Decanter](#)

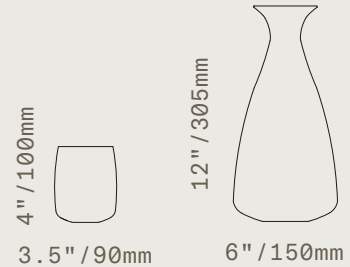

# Trace Series

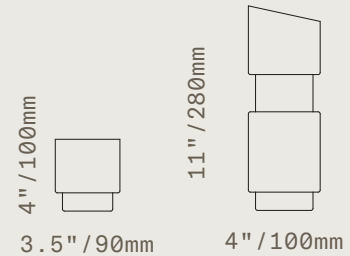

The sophisticated silhouette of the Trace Glass hints at traditional wine glass shapes while embracing a modern sophistication. With a gracefully curved base, the glass appears to float above the table. A perfect wine glass, Trace also brings a beautiful touch to water and fresh juices. The silhouette of the Trace Decanter is both familiar and mysterious. An eminently functional decanter or your favorite wines. The flared top is finished with a precisely cut and polished edge just right for smooth graceful pouring. See our website for more information on the [Trace Glass](#) and [Trace Decanter](#)

# Frame Series

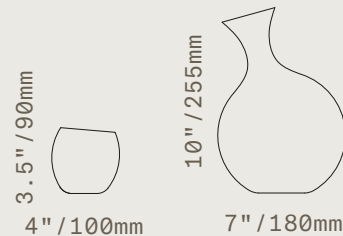

The profile of the Frame Glass steps in at the base, giving a sturdy yet elegant appearance. With precise proportions and softened corners, these glasses are a pleasure to hold and to use. They work beautifully for wine and cocktails, but welcome everyday all-purpose use. The profile of the Frame Decanter steps in and out in a series of subtle, softened right angles. The cut and polished top is given a slight bevel for a nice pour. See our website for more information on the [Frame Glass](#) and [Frame Decanter](#)

# Tilt Series

True to their name, each Tilt Glass and Decanter is intentionally crafted with a subtle yet unpredictable off-center tilt. Despite their playful appearance, they remain perfectly stable. The wobble of the Tilt Glasses' appearance is beautiful when displayed in a group. The spherical base of the Tilt Decanter transitions into a narrow neck with a flared mouth – designed to feel great in the hand and pour perfectly. Both the Glasses and Decanter have their color applied at the top and it swirls irregularly downward in curving waves. See our website for more information on the [Tilt Glass](#) and [Tilt Decanter](#)
