NEST VESSEL

Congratulations on your purchase of a SkLO Nest Vessel.

When unpacking individual items and parts of the light fixture, make sure to lay them out on a protective surface that will neither mar the delicate metal finishes nor scratch the glass. Gloves (nitrile) are provided and must be worn during installation to avoid fingerprints on the finish of the exposed metal parts.

Your SkLO object will arrive with the hand-blown glass elements packed separately from the metal parts.

CONTENTS:

** Vessel shape and its proportions may vary per order.*

1. Carefully slide the two metal parts together using the slots provided in each piece, forming a cross-shaped stand (Figure 1).

2. Place the assembled stand on a flat, stable surface. Carefully lower the glass element into the center of the stand. Allow the glass element to rest securely in place on the metal support tabs at the bottom of the stand (Figure 2). Take good care to avoid scratching the glass against the metal parts of the stand.

CAUTION - Do not attempt to lift or move the assembled Nest Vessel as the two-part metal base can come apart. The glass element should be removed and safely set aside before moving or lifting the base.
