Nest

VESSEL

From left: Shape 5, Shape 3, Shape 2, Shape 4 and Shape 1

Nest Vessel challenges color theory by pairing translucent handblown glass against solid metal. The cylindrical vessel is cut and polished at the opening, and set snugly inside its own fitted sculptural base in powdercoat. Available in 5 shapes, each in its own colorway, from earthy Smoke/Brick to verdant Pine Tree Green/Pistachio. Best for console tables and shelving, where a cluster of contrasting sizes plays with scale.

Handblown glass production results in variation in dimensions, shape, color saturation, color tint, and imperfections such as small bubbles. This is part of SkLO design intent
