SkLO

Linear

MULTI-PENDANT CANOPY

The Linear Multi-Pendant Canopy program is designed to enable multiple SkLO pendants to be suspended from a single 5" (125mm) wide linear canopy. The canopy is available in various lengths, and longer lengths are comprised of multiple sections. This provides the Trade customers with the opportunity to create highly customized SkLO light fixtures. The number of individual pendants and their composition are entirely customizable. The customer is responsible for the design of custom Linear Multi-Pendant Canopy fixtures. See the Ordering Instructions on the following pages for details.

Review the Terms & Conditions available in the Downloads section of the Linear Multi-Pendant Canopy product page on our website before ordering

Stem-suspended pendants require an additional 30-Degree Swivel accessory to accommodate sloped ceilings of up to 30 degrees – must be ordered separately

Canopies are not sold individually and are intended for use with SkLO fixtures only, see list of compatible pendant designs below

Made in the Czech Republic

Compatible Products

Product Name	Product SKU
Balance 1.0 Pendant	LT500
Balance 2.0 Pendants	LT502-504
Balance 3.0 Pendants	LT530-532

MULTI-PENDANT CANOPY

Ordering Instructions

1. Select a canopy size appropriate for the desired type, number, and composition of pendants.
2. Download the 3D model of the canopy from the Linear Multi-Pendant Canopy product page. Make sure to read the included Fabrication File User Guide PDF file for additional important instructions.
3. Download the 3D model of the pendant from the individual pendant's product page.
4. Use the 3D models of the canopy and pendant to design your fixture. In the canopy model file, note the areas marked as “no-drilling area”, where pendants cannot be placed.
5. Note that SkLO glass is hand-blown, and dimensions and drawings of glass elements may have significant variations. Allow for reasonable tolerances in glass elements when laying out the composition of your fixture.
6. Produce a model of the canopy face showing the precise locations of each pendant, and provide clear, legible dimensions for each pendant location.
7. Save a 2D copy in PDF format and email it to SkLO along with your order.
8. Order the multi-pendant canopy and the individual pendants. When ordering, ensure you specify the overall drop lengths for each pendant (for stem-suspended pendants) or any additional cord lengths (for cord-suspended pendants).
